--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 12 July 2004 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

PERIOD FOR REPLY [check either a) or b)]

a) The period for reply expires 03 months from the mailing date of the final rejection.
 b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.
 ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. A Notice of Appeal was filed on _____. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.

2. The proposed amendment(s) will not be entered because:

- they raise new issues that would require further consideration and/or search (see NOTE below);
- they raise the issue of new matter (see Note below);
- they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
- they present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: See Continuation Sheet.

3. Applicant's reply has overcome the following rejection(s): _____.
 4. Newly proposed or amended claim(s) ____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
 5. The a) affidavit, b) exhibit, or c) request for reconsideration has been considered but does NOT place the application in condition for allowance because: _____.
 6. The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
 7. For purposes of Appeal, the proposed amendment(s) a) will not be entered or b) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: _____.
 Claim(s) objected to: _____.
 Claim(s) rejected: 1-4 and 6-23.
 Claim(s) withdrawn from consideration: _____.
 8. The drawing correction filed on ____ is a) approved or b) disapproved by the Examiner.
 9. Note the attached Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____.
 10. Other: _____.

Continuation of 2. NOTE: Amendments to claims such as "wherein transmitting the signal comprises transmitting the signal to a satellite in claim 15 change the scope of the claims and require further consideration.

Applicant argues Naiff does not teach circuit board for performing the function of reception of the data and transmission of radio frequency signals responsive thereto. This argument is respectfully traversed.

Naiff discloses transceiver 116 receives television and two-way control signals from the PC via a similar (e.g., RF path), a simple antenna which is coupled to a transceiver on the television interface card 40 installed in the PC 20. The transceiver provided on the television on the television interface card will be the counter part of transceiver 116 (col. 9, lines 18-27 and figure 6). Naiff further discloses communication with Internet and/or the television provider can be accommodated by an RF return path via coaxial or optical fiber cables 16, 10 (col. 6, lines 29-33) and the cables 16,10 are coupled to a satellite transceiver antenna (figure 4). The card comprises TV port 60 for receiving and transmitting RF signal between PC 20 and user interface module 24 (col. 7, lines 60-65), a telephone return port 64 enable a subscription television service provider (e.g. cable, satellite or MMDS) to poll the user's PC via a telephone connection in order to obtain billing information and/or download new firmware to the television interface card and/or new application software to the user's PC. Polling can alternatively be implemented using an RF return path to the subscription television service provider (col. 8, lines 6-13). Clearly, the card receives the data (via TV port 60, cable TV 62 or telephone return 64) and transmits radio frequency signals (via TV port 60 or telephone return 64) as claimed in independent claims 1, 6, 11. The data radio frequency signals are transmitted to a satellite (e.g. using RF return path to the subscription television service provider).

For reason given above, rejection on the claimed is maintained as discussed in the Final Office Action..
